The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of ICAO concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Les appellations employées dans cette publication et la présentation des données qui y figurent n'impliquent de la part de l'OACI aucune prise de position quant au statut juridique des pays, territoires, villes ou zones, ou de leurs autorités, ni quant au tracé de leurs frontières ou limites.

Las denominaciones empleadas en esta publicación y la forma en que aparecen presentados los datos que contiene no implican, de parte de la OACI, juicio alguno sobre la condición jurídica de ninguno de los países, territorios, ciudades o áreas, o de sus autoridades, ni respecto de la delimitación de sus fronteras o límites.

Употребляемые обозначения и изложение материала в настоящем издании не означают выражения со стороны ИКАО какого бы то ни было мнения относительно правового статуса страны, территории, города или района, или их властей, или относительно делимитации их границ.

Published yearly by ICAO under the authority of the Secretary General of the
INTERNATIONAL CIVIL AVIATION ORGANIZATION

**Changes incorporated into this edition
Modifications apportées dans la présente édition
Cambios incorporados en la presente edición
Изменения, включенные в данное издание**

This edition incorporates designators registered and corrective material received from States and manufacturers up to 30/3/09. Changes are listed below.

La présente édition contient les additifs et rectificatifs reçus des États et des constructeurs jusqu'au 30/3/09. Les changements sont indiqués ci-dessous.

La edición abarca designadores registrados y correcciones recibidas de los Estados y fabricantes al 30/3/09. Los cambios se indican a continuación.

В настоящее издание включены зарегистрированные условные обозначения и исправленный материал, полученный от государств, до 30/3/09 года. Все изменения приведены ниже.

FOREWORD

GENERAL

This document contains designators for those aircraft types which are most commonly provided with air traffic service (ATS). It was originally prepared as a result of recommendations of the Rules of the Air and Air Traffic Services/Operations Divisional Meeting (May 1963) and the Third Meeting of the Air Traffic Control Automation Panel (October 1963) and was published in accordance with directives of the Council. As a result of the substantial comments received from the air traffic services units, the most common operational users of designators, the Secretariat with the assistance from Air Traffic Control The Netherlands and the European Organization for the Safety of Air Navigation (EUROCONTROL), undertook in 1996 a major revision of the document. The revision was done with the aim of ensuring that the document satisfies its original purpose and amended to accommodate the increased use of automation in ATS and in data exchange.

New editions of the document will be issued once a year and to keep the document up-to-date between the editions, amendments to the latest edition will be published as they accumulate. The information contained in this document is also made available for printing, viewing and searching in an electronic format via an on-line website database which can be accessed at www.icao.int/anb/ais/8643.

Errors, omissions, requests for additional assignments or amendments should be addressed to the Secretary General of ICAO, 999 University Street, Montreal, Quebec, Canada H3C 5H7.

DOCUMENT STRUCTURE

PART 1: lists the common names of the aircraft manufacturers followed by the aircraft types they produce(d).

PART 2: lists the aircraft types by their type designator in an alpha-numeric order.

PART 3: lists the aircraft types by their model number and/or model name.

PART 4: lists the common names of the aircraft manufacturers followed by their full name(s).

Note 1.— Where model numbers or model names are between brackets, they refer to military model numbers or names following the manufacturer's, or vice versa.

Note 2.— An aircraft type built by more than one manufacturer (licence-built, company take-overs, company name changes, etc.) is listed under the common name of each manufacturer.

FORMULATION OF AIRCRAFT TYPE DESIGNATORS AND ADDITIONAL INFORMATION

Aircraft Type Designators

When assigning the aircraft type designator, ICAO will do that in accordance with the following basic principles:

- a) it will, in principle, assign an aircraft type designator to all aircraft heavier than micro-/ultra-light;
- b) a designator will consist of not more than four characters and will primarily be intended for use in **flight plans** and associated air traffic services **messages**;
- c) a designator will, in principle, be derived from the manufacturer's model number or model name or, from a common military type number;
- d) only one designator will be assigned per aircraft type;
- e) a designator will not be changed for licence-built aircraft, when the aircraft type is sold to or manufactured by a different company or, when the name of a manufacturing company changes or, when the aircraft type is derived or converted from another type;

- f) a different designator for a variant or subtype will only be allocated when a difference in a performance is significant for air traffic services, or when no shared designator can be assigned;
- g) if a designator has to be used for a balloon, a glider, an airship, a micro-/ultra-light aircraft, a micro-/ultra-light helicopter, or a micro-/ultra-light gyrocopter, the following designators shall be used respectively: **BALL, GLID, SHIP, ULAC, UHEL, GYRO**;

Note 1.— For the purposes of this document, micro-/ultra-light aircraft are those aircraft types with a maximum certified take-off mass of 454 kg/1 000 lb or less and a stalling speed not greater than 35 kt.

Note 2.— Micro-/ultra-light helicopters and gyrocopters are those helicopters or gyrocopters with a maximum certified take-off mass of 454 kg/1 000 lb or less.

- h) aircraft types not listed in this document shall use the designator **ZZZZ**, with a description of the type in field 18 of the ICAO flight plan;
- i) the more important "homebuilt" aircraft types will also be assigned designators, however, they will only be listed under the heading of the original designer, or under the heading of a manufacturer that produces or produced the type in series; and
- j) in order to avoid confusion, Roman numerals as part of aircraft model numbers or names will, in this document, always be replaced by Arabic numerals.

Wake Turbulence Category (WTC)

The wake turbulence category (WTC) indicator will follow the aircraft type designator and is provided on the basis of the maximum certificated take-off mass, as follows:

H (Heavy)	aircraft types of 136 000 kg (300 000 lb) or more;
M (Medium)	aircraft types less than 136 000 kg (300 000 lb) and more than 7 000 kg (15 500 lb); and
L (Light)	aircraft types of 7 000 kg (15 500 lb) or less.

Note.— Where variants of an aircraft type fall into different wake turbulence categories, both categories are listed (e.g. L/M or M/H). In these cases, it is the responsibility of the pilot or operator to enter the appropriate single character wake turbulence category indicator in Item 9 of the ICAO model flight plan form.

Description of Aircraft Type

Three characters will be used to compose the description of aircraft type:

First character:

L	landplane
S	seaplane
A	amphibian
H	helicopter
G	gyrocopter
T	tilt-wing aircraft

Note.— A floatplane, which can temporarily be converted to a landplane or vice versa, will not be listed as a seaplane or amphibian, but as a landplane.

Second character:

1, 2, 3, 4, 6, 8 or C, — number of engines

Note.— Character C is applicable to fixed-wing aircraft only and indicates that two engines are coupled to drive a single propeller system.

Third character:

P	piston engine
T	turboprop/turboshaft engine
J	jet engine
E	electric engine

Example: L2T — a landplane with two turboprop/turboshaft engines.

ACTION TO BE TAKEN BY STATES

States are requested to take appropriate action, i.e.:

- a) to advise aircraft manufacturers of the purpose of the *Aircraft Type Designators* and to request their cooperation in its development and its implementation by applying the principles on which it is based when assigning such designators;
- b) in order to keep the document up to date provide ICAO annually, if possible on an electronic file, with the following information from their aircraft registers:
 - aircraft registration;
 - manufacturer, type and model number;
 - manufacturer's serial or construction number; and
 - expiration date of the Certificate of Airworthiness or permit/authorization to fly;
- c) to request their military departments to agree to the use of a civil designator for those aircraft types which are employed in both civil and military operations.

AVANT-PROPOS

GÉNÉRALITÉS

Le présent document contient la liste des indicatifs des types d'aéronef qui bénéficient le plus couramment du service de contrôle de la circulation aérienne. Il a été élaboré à l'origine pour donner suite aux recommandations de la Réunion Règles de l'air et services de la circulation aérienne/Exploitation à l'échelon division (mai 1963) et de la troisième Réunion du Groupe d'experts sur l'automatisation du contrôle de la circulation aérienne (octobre 1963), et publié conformément aux directives du Conseil. Pour tenir compte des observations de fond formulées par les organismes des services de la circulation aérienne, qui sont les utilisateurs opérationnels les plus courants des indicatifs, le Secrétariat a entrepris en 1996 de réviser ce document en profondeur, avec l'aide de l'organisme chargé du contrôle de la circulation aérienne des Pays-Bas et de l'Organisation européenne pour la sécurité de la navigation aérienne (EUROCONTROL). Cette révision visait à s'assurer que le document remplit bien son rôle initial, tout en l'amendant pour tenir compte de l'usage accru de l'automatisation en ATS et dans les échanges de données.

Une nouvelle édition du présent document sera publiée chaque année, et pour tenir le document à jour dans l'intervalle, des amendements de la dernière édition seront publiés à mesure qu'ils se présentent. Les renseignements contenus dans le présent document peuvent également faire l'objet de recherches, être imprimés et consultés en format électronique à partir d'une base de données en ligne du site Web de l'OACI, accessible à l'adresse suivante: www.icao.int/anb/ais/8643.

Toute correspondance concernant des erreurs ou des omissions, ou une demande d'attribution ou de modification d'attribution, doit être adressée au Secrétaire général de l'OACI, 999, rue University, Montréal (Québec), Canada H3C 5H7.

STRUCTURE DU DOCUMENT

PARTIE 1 : liste des noms usuels des constructeurs d'aéronefs, suivis des types d'aéronef qu'ils produisent.

PARTIE 2 : liste des types d'aéronef dans l'ordre alphanumérique des indicatifs de type.

PARTIE 3 : liste des types d'aéronef par numéro et/ou nom de modèle.

PARTIE 4 : liste des noms usuels des constructeurs d'aéronefs, suivis de leur nom au complet.

Note 1.— Lorsque le numéro ou le nom du modèle est entre crochets, il s'agit du numéro ou du nom d'un modèle militaire suivi de celui attribué par le constructeur, ou vice versa.

Note 2.— Tout type d'aéronef construit par plusieurs constructeurs (construction sous licence, absorption d'une société, changement de nom d'une société, etc.) figure dans la liste sous le nom usuel de chaque constructeur.

ÉTABLISSEMENT DES INDICATIFS DE TYPES D'AÉRONEF ET RENSEIGNEMENTS COMPLÉMENTAIRES

Indicatifs de types d'aéronef

L'OACI attribuera les indicatifs de types d'aéronef en se fondant sur les grands principes suivants :

- a) elle assignera en principe un indicatif de type d'aéronef à tous les aéronefs plus pesants qu'un ultra-léger ;
- b) les indicatifs ne comporteront pas plus de quatre caractères et seront surtout destinés à être utilisés dans les **plans de vol** et les **messages** corrélatifs des services de la circulation aérienne ;
- c) tout indicatif sera en principe dérivé du numéro ou du nom du modèle conçu par le constructeur, ou encore d'un numéro de type militaire courant ;
- d) un seul indicatif sera attribué à chaque type d'aéronef ;
- e) l'indicatif ne sera pas modifié pour un aéronef construit sous licence, lorsque le type d'aéronef est acquis ou construit par une autre société, ou lorsque le nom du constructeur change, ou encore si le type d'aéronef en question est dérivé d'un autre type ou constitue une conversion de type ;

- f) une variante ou un sous-type n'obtiendra un indicatif différent que s'il y a une différence significative des performances pour les services de la circulation aérienne, ou s'il n'est pas possible d'attribuer un indicatif commun ;
- g) si un indicatif se révèle nécessaire pour un ballon, un planeur, un dirigeable, un aéronef ultra-léger, un hélicoptère ultra-léger ou un autogire ultra-léger, les indicatifs utilisés seront respectivement les suivants: **BALL, GLID, SHIP, ULAÇ, UHEL, GYRO** ;

Note 1.— Aux fins du présent document, les aéronefs ultra-légers sont des types d'aéronef dont la masse maximale au décollage certifiée est égale ou inférieure à 454 kg (1 000 livres) et dont la vitesse de décrochage ne dépasse pas 35 noeuds.

Note 2.— Les hélicoptères ultra-légers et les autogires ultra-légers sont des hélicoptères et des autogires dont la masse maximale au décollage certifiée est égale ou inférieure à 454 kg (1 000 livres).

- h) pour les types d'aéronef qui ne figurent pas dans le présent document, on utilisera l'indicatif **ZZZZ**, en fournissant une description du type dans le champ 18 du plan de vol OACI ;
- i) des indicatifs seront attribués aux types d'aéronef « de fabrication artisanale » les plus importants, mais ils ne figureront dans la liste que sous la rubrique du concepteur initial, ou sous celle d'un constructeur qui produit ou a produit en série le type considéré ;
- j) pour éviter les confusions, les chiffres romains utilisés dans les numéros ou les noms de modèles d'aéronef seront toujours remplacés dans le présent document par des chiffres arabes.

Catégorie de turbulence de sillage (WTC)

L'indicatif de catégorie de turbulence de sillage suivra l'indicatif de type d'aéronef et sera fondé sur la masse maximale au décollage certifiée, comme suit :

H (lourd)	types d'aéronef de masse égale ou supérieure à 136 000 kg (300 000 livres) ;
M (moyen)	types d'aéronef de masse inférieure à 136 000 kg (300 000 livres) mais supérieure à 7 000 kg (15 500 livres) ;
L (léger)	types d'aéronef de masse égale ou inférieure à 7 000 kg (15 500 livres).

Note.— Lorsqu'une version d'un type d'aéronef correspond à différentes catégories de turbulence de sillage, les deux catégories sont indiquées (soit L/M ou M/H). Dans ces cas, il appartiendra au pilote ou à l'exploitant d'indiquer la catégorie de turbulence de sillage appropriée en inscrivant l'indicatif à une lettre à la case 9 du modèle OACI de formule de plan de vol.

Description du type d'aéronef

Trois caractères seront utilisés pour composer la description du type d'aéronef :

Premier caractère :

L	avion
S	hydravion
A	amphibie
H	hélicoptère
G	autogire
T	aéronef à voilure basculante

Note.— Les avions à flotteurs qui peuvent être convertis temporairement en avions ordinaires, et vice versa, ne figureront pas dans la liste comme hydravions ou amphibies, mais plutôt comme avions.

Deuxième caractère :

1, 2, 3, 4, 6, 8 ou **C** — nombre de moteurs

Note.— La lettre C s'applique seulement aux aéronefs à voilure fixe et indique la présence de deux moteurs couplés entraînant une hélice unique.

Troisième caractère :

- P moteur à pistons
- T turbopropulseur/turbomoteur
- J réacteur
- E moteur électrique

Exemple : L2T — avion bimoteur à turbopropulseurs/turbomoteurs.

MESURES QUE LES ÉTATS DOIVENT PRENDRE

Il est demandé aux États de prendre les mesures appropriées suivantes :

- a) informer les constructeurs d'aéronefs de l'objet du document *Indicatifs de types d'aéronef* et solliciter leur collaboration pour l'élaboration et la mise en œuvre de ce document, en appliquant les principes qui régissent l'attribution des indicatifs en question ;
- b) pour la tenue à jour du document, fournir annuellement à l'OACI, si possible sous forme électronique, les renseignements ci-après, tirés de leurs registres aéronautiques :
 - immatriculation de l'aéronef ;
 - constructeur, numéro de type et de modèle ;
 - numéro de construction ou de série du constructeur ;
 - date d'expiration du certificat de navigabilité, ou encore du permis ou de l'autorisation de voler ;
- c) demander à leurs autorités militaires d'accepter d'utiliser un indicatif civil pour les types d'aéronef qui sont utilisés indifféremment pour des vols civils et des vols militaires.

PREÁMBULO

GENERALIDADES

Este documento contiene los designadores de aquellos tipos de aeronaves a los que se proporciona más comúnmente servicio de tránsito aéreo (ATS). Se preparó originalmente como resultado de las recomendaciones de la Conferencia departamental "Reglamento del aire y servicios de tránsito aéreo/operaciones" (mayo de 1963) y de la III Reunión del Grupo de expertos sobre automatización del control del tránsito aéreo (octubre de 1963) y se publicó de conformidad con las instrucciones del Consejo. A raíz de los abundantes comentarios recibidos de las dependencias de servicios de tránsito aéreo, que son quienes utilizan más corrientemente los designadores a nivel operacional, la Secretaría emprendió en 1996 una importante revisión de este documento con la ayuda del Control de tránsito aéreo Países Bajos y la Organización Europea para la Seguridad de la Navegación Aérea (EUROCONTROL). La revisión se efectuó con el objetivo de asegurar que el documento satisface el propósito original, habiéndose enmendado en atención al creciente uso de la automatización en ATS y en el intercambio de datos.

Se publicará una nueva edición cada año y para mantener el documento actualizado entre las ediciones, se publicarán las enmiendas de la última edición en la medida en que se acumulen. Además, en el sitio www.icao.int/anb/ais/8643 puede obtenerse la información de este documento para utilizarla con fines de búsqueda, impresión y análisis en formato electrónico a partir de la base de datos del sitio web.

Toda correspondencia relativa a errores y omisiones o solicitud respecto de asignaciones adicionales o enmienda deberá enviarse al Secretario General de la OACI, 999 University Street, Montreal, Quebec, Canadá, H3C 5H7.

ESTRUCTURA DEL DOCUMENTO

- PARTE 1: contiene la lista de los fabricantes de aeronaves por su nombre comercial corriente, seguido de los tipos de aeronaves que fabrican.
- PARTE 2: contiene la lista de tipos de aeronaves, por designador de tipo en orden alfanumérico.
- PARTE 3: contiene la lista de tipos de aeronaves, por número de modelo y/o nombre del modelo.
- PARTE 4: contiene la lista de los fabricantes de aeronaves por su nombre comercial corriente, seguido de su nombre completo.

Nota 1.— Cuando el número o nombre del modelo va entre paréntesis, significa que se trata de un número o nombre de modelo militar, indicándose seguidamente el fabricante, o viceversa.

Nota 2.— Cuando un tipo de aeronave lo construye más de un fabricante (bajo licencia, por absorción de la empresa, cambio de nombre de la empresa, etc.), aparece en la lista bajo el nombre comercial corriente de los distintos fabricantes.

FORMULACIÓN DE LOS DESIGNADORES DE TIPOS DE AERONAVE E INFORMACIÓN ADICIONAL

Designadores de tipos de aeronave

Cuando proceda a la asignación del designador de tipo de aeronave, la OACI se regirá por los siguientes principios básicos:

- a) en principio se asignará un designador de tipo de aeronave a toda aeronave que sea más pesada que las micro/ultraligeras;
- b) el designador constará de cuatro caracteres como máximo y su uso primordial será en los **planes de vuelo** y los correspondientes **mensajes** de los servicios de tránsito aéreo;
- c) el designador se establecerá en principio a partir del número o nombre del modelo del fabricante o del número del tipo militar común;
- d) sólo se asignará un designador por tipo de aeronave;

- e) el designador no cambiará en el caso de aeronaves fabricadas bajo licencia, ni cuando el tipo de aeronave lo venda o fabrique una empresa distinta o cambie el nombre de la empresa que lo fabrica o cuando se trate de un tipo de aeronave derivado o convertido a partir de otro tipo;
- f) sólo se asignará un designador distinto para una variante o subtipo cuando la diferencia de performance sea significativa para los servicios de tránsito aéreo o cuando no pueda asignarse un designador compartido;
- g) si debe utilizarse un designador para un globo, planeador, dirigible, aeronave micro/ultraligera, helicóptero micro/ultraligero, o girohelicóptero micro/ultraligero, se emplearán respectivamente los designadores siguientes: **BALL, GLID, SHIP, ULAC, UHEL, GYRO**;

Nota 1.— A los efectos de este documento, se consideran aeronaves micro/ultraligeras los tipos de aeronaves con una masa máxima certificada de despegue de 454 kg/1 000 lb o inferior y una velocidad de pérdida que no sobrepase de 35 kt.

Nota 2.— Se consideran helicópteros y girohelicópteros micro/ultraligeros aquellos que tienen una masa máxima certificada de despegue de 454 kg/1 000 lb o inferior.

- h) los tipos de aeronaves que no figuran en las listas de este documento utilizarán el designador **ZZZZ**, describiéndose el tipo en cuestión en la casilla 18 del plan de vuelo de la OACI;
- i) también se asignarán designadores a aquellos tipos de aeronaves más importantes construidas "por aficionados", pero sólo se alistarán bajo el encabezamiento del diseñador original, o bajo el encabezamiento de un fabricante que produzca o haya producido dicho tipo en serie; y
- j) para evitar confusiones, cuando hubiera números romanos en el número o nombre del modelo de aeronave, en el presente documento siempre se remplazarán por números arábigos.

Clasificación por categoría de estela turbulenta (WTC)

El indicador de la categoría de estela turbulenta (WTC) seguirá al designador de tipo de aeronave y se anotará basándose en la masa máxima certificada de despegue, como sigue:

H (pesada)	tipos de aeronaves de 136 000 kg (300 000 lb) o más;
M (media)	tipos de aeronaves de menos de 136 000 kg (300 000 lb) y más de 7 000 kg (15 500 lb); y
L (ligera)	tipos de aeronaves de 7 000 kg (15 500 lb) o menos.

Nota.— Cuando las variantes de un tipo de aeronaves corresponden a diferentes categorías de estela turbulenta, se indican ambas categorías (p. ej., L/M o M/H). En estos casos el piloto o el explotador es responsable de anotar en la casilla 9 del formulario modelo de plan de vuelo de la OACI, el indicador apropiado de una sola de la categoría de estela turbulenta.

Descripción del tipo de aeronave

Se emplearán tres caracteres para la descripción del tipo de aeronave

Primer carácter:

L	avión terrestre
S	hidroavión
A	anfibia
H	helicóptero
G	girohelicóptero
T	aeronave de ala basculante

Nota.— Los aviones con flotadores que pueden convertirse temporalmente en avión terrestre o viceversa, no figurarán en la lista como hidroavión o anfibia sino como avión terrestre.

Segundo carácter:

1, 2, 3, 4, 6, 8 o C — número de motores

Nota.— El carácter C se aplica únicamente a aeronaves de alas fijas e indica que dos motores están acoplados para accionar un solo sistema de hélice.

Tercer carácter:

- P** motor de émbolo
- T** motor de turbohélice/turboeje
- J** motor de reacción
- E** motor eléctrico

Ejemplo: **L2T** — avión terrestre con dos motores de turbohélice/turboeje.

MEDIDAS QUE DEBEN ADOPTAR LOS ESTADOS

Se pide a los Estados que adopten las medidas pertinentes siguientes:

- a) comunique a los fabricantes de aeronaves los fines de estos *Designadores de tipos de aeronave* y solicite su colaboración para su preparación y puesta en práctica, aplicando los principios en que se basa al asignar los designadores;
- b) para mantener el documento actualizado, proporcione a la OACI cada año, de ser posible por archivo electrónico, la siguiente información de su registro de aeronaves:
 - matrícula de la aeronave;
 - fabricante, tipo y número de modelo;
 - número de fabricación o de serie del fabricante; y
 - expiración de la fecha del Certificado de aeronavegabilidad o del permiso/autorización de vuelo;
- c) solicite a los departamentos militares que lleguen a un acuerdo para usar el designador civil respecto de aquellos tipos de aeronaves que se empleen indistintamente en operaciones civiles y militares.

ПРЕДИСЛОВИЕ

ОБЩИЕ ПОЛОЖЕНИЯ

В настоящем документе содержатся условные обозначения тех типов воздушных судов, которым обычно предоставляется обслуживание воздушного движения (ОВД). Он был первоначально подготовлен на основании рекомендаций Специализированного совещания по правилам полетов, обслуживанию воздушного движения и производству полетов (май 1963 года) и третьего совещания Группы экспертов по автоматизации управления воздушным движением (октябрь 1963 года) и опубликован в соответствии с указаниями Совета. С учетом важных замечаний, полученных от органов обслуживания воздушного движения, наиболее часто использующих в своей работе условные обозначения, Секретариат с помощью полномочного органа Нидерландов по управлению воздушным движением и Европейской организации по безопасности воздушной навигации (ЕВРОКОНТРОЛЬ) предпринял в 1996 году пересмотр этого документа. Цель пересмотра заключалась в том, чтобы обеспечить соответствие данного документа своему первоначальному предназначению с учетом изменений, обуславливаемых необходимостью отразить расширенное использование автоматизации при ОВД и обмен данными.

Новые издания данного документа будут публиковаться один раз в год, и, для того чтобы поддерживать его актуальность в период между изданиями, к самому последнему из них будут выпускаться поправки по мере их накопления. Содержащаяся в данном документе информация также имеется в электронном формате для распечатки, просмотра и поиска в диалоговой базе данных на web-сайте по адресу: www.icao.int/anb/ais/8643.

Уведомления об ошибках и пропусках и просьбы о дополнительных условных обозначениях или поправках следует направлять в адрес Генерального секретаря ИКАО: 999 University Street, Montreal, Quebec, Канада H3C 5H7.

СТРУКТУРА ДОКУМЕНТА

- ЧАСТЬ 1: в ней перечислены широко распространенные наименования изготовителей воздушных судов с последующим указанием типов воздушных судов, которые они производят (производили).
- ЧАСТЬ 2: в ней представлен перечень типов воздушных судов посредством условного обозначения их типов в алфавитно-цифровом порядке.
- ЧАСТЬ 3: в ней приводится список типов воздушных судов посредством указания номера модели и/или наименования модели.
- ЧАСТЬ 4: в ней перечислены широко распространенные наименования изготовителей воздушных судов с последующим указанием полного наименования (наименований).

Примечание 1. Там, где номера или наименования моделей приводятся в скобках, они относятся к номерам или наименованиям военных моделей с последующим указанием наименований изготовителей или наоборот.

Примечание 2. Воздушное судно, изготовленное несколькими изготовителями (изготовление по лицензии, после слияния компаний, после изменения наименований компаний и т. д.), указывается в перечне под широко распространенным наименованием каждого изготовителя.

СОСТАВЛЕНИЕ УСЛОВНЫХ ОБОЗНАЧЕНИЙ ТИПОВ ВОЗДУШНЫХ СУДОВ И ДОПОЛНИТЕЛЬНОЙ ИНФОРМАЦИИ

Условные обозначения типов воздушных судов

При присвоении условного обозначения типа воздушного судна ИКАО будет придерживаться следующих основных принципов:

- a) Организация, в принципе, будет присваивать условные наименования типа всем воздушным судам тяжелее сверх-ультралеких;
- b) условное обозначение будет состоять из не более чем четырех знаков и в основном будет предназначаться для использования в планах полета и соответствующих сообщениях, относящихся к обслуживанию воздушного движения;
- c) условное обозначение будет, в принципе, основываться на номере или наименовании модели изготовителя или на общераспространенном номере военного типа;

- d) воздушному судну будет присваиваться только одно условное обозначение;
- e) условное обозначение не будет меняться для воздушного судна, построенного по лицензии, когда воздушное судно данного типа продается или изготавливается другой компанией, или когда меняется наименование компании изготовителя, или когда воздушное судно данного типа получено или преобразовано из воздушного судна другого типа;
- f) другое условное обозначение, предназначенное для варианта или подтипа, будет распределяться в случае существенного различия в характеристиках, имеющего значение для обслуживания воздушного движения, или в тех случаях, когда нельзя присвоить совместно используемое условное обозначение;
- g) если условное обозначение должно использоваться для аэростата, планера, дирижабля, сверх-/ультралегкого воздушного судна или сверх-/ультралегкого автожира, применяются соответственно следующие условные обозначения: **BALL, GLID, SHIP, ULAC, GYRO**;

Примечание 1. Для целей настоящего документа к сверх-/ультралегким воздушным судам относятся воздушные суда с максимальной сертифицированной взлетной массой 454 кг (1000 фунтов) и менее и скоростью сваливания не более 35 уз.

Примечание 2. К сверх-/ультралегким вертолетам и автожирам относятся вертолеты и автожиры с максимальной сертифицированной взлетной массой 454 кг (1000 фунтов) и менее.

- h) для воздушных судов тех типов, которые не указаны в настоящем документе, используется условное обозначение **ZZZZ** с описанием типа в графе 18 плана полета ИКАО;
- i) кроме того, условные обозначения будут присваиваться имеющим более важное значение типам воздушных судов "отечественной постройки", однако они будут перечисляться только под заголовком первоначального разработчика или под заголовком изготовителя, который производит или производил данный тип в серии; и
- j) в целях избежания путаницы римские цифры, являющиеся частью номеров или наименований моделей воздушных судов, будут в настоящем документе везде заменены на арабские.

Категория турбулентности в следе (WTC)

Показатель категории турбулентности в следе (WTC) будет следовать после условного обозначения типа воздушного судна и представляться на основе максимальной сертифицированной взлетной массы следующим образом:

- H** (тяжелые) типы воздушных судов массой 136 000 кг (300 000 фунтов) или более;
- M** (средние) типы воздушных судов с массой менее 136 000 кг (300 000 фунтов) и более 7000 кг (15 500 фунтов);
- L** (легкие) типы воздушных судов с массой 7000 кг (15 500 фунтов) или менее.

Примечание. В случае если варианты типа воздушного судна подпадают под разные категории турбулентности в следе, указываются обе категории (например, L/M или M/H). В таких случаях за включение соответствующего одного знака для обозначения категории турбулентности в следе в раздел 9 типового плана полета ИКАО отвечает пилот или эксплуатант.

Описание типов воздушных судов

Для составления описания типа воздушного судна будут использоваться три знака.

Первый знак:

- L** сухопутный самолет
- S** гидросамолет
- A** амфибия
- H** вертолет
- G** автожир
- T** воздушное судно с поворотным крылом

Примечание. Поплавковые гидросамолеты, которые могут быть временно переделаны в сухопутный самолет или наоборот, не будут указываться как гидросамолеты или амфибии, а вместо этого будут указываться как сухопутные самолеты.

Второй знак:

1, 2, 3, 4, 6, 8 или С — число двигателей.

Примечание. Знак С применяется только к воздушным судам с неподвижным крылом и означает, что два двигателя спарены для приведения в движение единой системы воздушных винтов.

Третий знак:

P поршневой двигатель,
T турбовинтовой/турбовальный двигатель,
J турбореактивный двигатель,
E электрический двигатель.

Пример: L2T — сухопутный самолет с двумя турбовинтовыми/турбовальными двигателями.

ДЕЙСТВИЯ ГОСУДАРСТВ

Государствам предлагается предпринять следующие действия, т. е.:

- a) информировать изготовителей воздушных судов о целях документа "Условные обозначения типов воздушных судов" и просить их сотрудничать в разработке и внедрении этого документа путем применения лежащих в его основе принципов при присвоении таких условных обозначений;
- b) в целях постоянного обновления данного документа ежегодно предоставлять в ИКАО, по возможности в виде электронного файла, следующую информацию из своих регистров воздушных судов:
 - регистрационный номер воздушного судна;
 - изготовитель, тип и номер модели;
 - заводской или серийный номер изготовителя; и
 - дата окончания срока действия удостоверения годности к полетам или допуска/разрешения на выполнение полетов;
- c) просить военные ведомства согласиться с использованием гражданского условного обозначения для тех типов воздушных судов, которые используются как для гражданских, так и военных полетов.
